INTRODUCTION

In accordance with section 17 of the Education Act, the Ministère de l'Éducation hereby presents the list of instructional materials authorized for use in schools which will be providing education at the preschool and elementary levels in 1988-1989.

This publication lists titles authorized for the new programs and courses, and updates the list of titles authorized for the former programs and courses. It replaces all previous official lists which have been published by the Ministère.

CONTENTS

Section I of this list contains all of the titles currently authorized for use with the **new programs** and courses.

Section II of this list contains all of the titles authorized for use with the **former programs** and courses. The Ministère can offer educational organizations no assurance that these will be suitable for the new programs and courses. These titles will be removed from the list when implementation of the new programs and courses becomes compulsory.

DEFINITIONS

• Basic materials

Materials designed specifically for teaching, which correspond with the compulsory elements of a program or course which is in effect, and which are required by the students of a class for the duration of the program or course.

Teacher's manuals which accompany the basic teaching materials are included in this category.

Workbooks which in themselves constitute basic teaching materials, or which are part of such materials, require ministerial authorization for classroom use.

• Complementary materials

Materials designed particularly (though not exclusively) for teaching, which correspond to some elements of a program or course which is in effect, and which are for occasional or optional classroom use. To be authorized, complementary instructional materials must be reusable.

Usage dictionaries, handbooks for grammar, and atlases are considered by the Ministère to be teaching materials. Consequently, all works of this type are subject to ministerial authorization, and are generally classified and listed as complementary material.

• Reference materials

Materials classified as reference or resource works are considered inadmissible for authorization, and do not require official listing in order to be purchased by school boards. Included in this category are general reference works such as biographies and encyclopedias, works of general interest and works of a literary nature such as anthologies, plays, periodicals, short stories, poetry and novels.

However, literary materials which contain a significant instructional component, or which are accompanied by a teacher's guide, may be classified and listed as **complementary** material.

CRITERIA FOR AUTHORIZATION

Authorization of teaching materials indicates that they show an acceptable level of quality with respect to:

- the instructional requirements of a given program or course which is in effect;
- correct language usage;
- moral and religious values;
- the use of official place names;
- the use of the international measurement system;
- the requirement pertaining to discriminatory stereotypes.

SUPPLEMENT TO THE ANNUAL LISTS

During the months of June and October 1988, the Ministère will publish supplements to the 1988-1989 annual lists. These supplements will contain only the titles of authorized basic and complementary materials not included in the present list, and the titles of materials recently submitted for authorization as basic material.
